

Braille Displays

PAC Mate Portable Braille Displays

Truly the first-of-their-kind, PAC Mate Portable Braille Displays are as versatile as they are affordable. Featuring a simple platform, the 20-cell and 40-cell refreshable Braille units attach securely to your computer with a USB cable or connect to the PAC Mate Omni™ to form one unit.

- True modular design - attach to your PAC Mate when you're on the go; attach to your PC when you're home or in your office
- Smooth display surface - no seams between cells - provides the comfortable feel of paper
- WHIZWHEELS and programmable hot keys
- Set Braille firmness to your preference with built-in VariBraille
- Highly affordable without sacrificing the features you most want and need

Focus 40 & 80 Braille Displays

Focus refreshable Braille displays with unequalled user control. The latest in Braille display technology, the portable and affordable Focus 40 and 80 put you in control as you smoothly navigate the Windows® environment. Focus is packed with advanced features and options that can be easily configured through JAWS for Windows.

- Freedom Scientific's exclusive Whiz Wheels® let you scroll by line, sentence, or paragraph, or pan through a document.
- Front panel select buttons can be used in combination with panning buttons, rocker bars, and cursor router keys to select a block of text, page up or down, or move to the beginning or end of a document.
- 10 dual-purpose hot keys centered behind the cursor routers give instant access to many Braille and JAWS commands. Use these to enable Contracted Braille, switch to display modes such as structured and line mode, or perform keyboard commands like TAB, SHIFT + TAB, HOME etc.
- For users who like a Perkins style keyboard, simply remove a cover to make available this logical, structured interface to issue navigation, Windows, and JAWS commands without removing your hands from the display.
