

## Braille Printers

### Braille and ink on the same page

The ViewPlus Emprint is the world's only Braille and colour ink embosser. It prints Braille and ink on the same page and can also print graphics.

- New easy-to-use operator panel with tactile buttons
- Choice of case colours - fire or ice (red or white)
- Uses the same paper and ink cartridges as a HP Inkjet printer
- Software automatically formats Word and Excel documents for Braille
- Creates raised visual images on paper from anything on the computer screen
- Includes Tiger Designer - tactile graphics design software for Windows
- Employs Tiger technology - the new standard in embossed tactile graphics

### Specifications

### Cub Jr. Braille Printer

For those with a tight budget, the ViewPlus Cub Jr. Braille Printer is the most compact and affordable option, but still boasts all the benefits of being powered by Tiger. The Cub Jr. is quiet and makes it easy to emboss high-resolution tactile graphics and Braille.

Because it's Powered by Tiger, you can be assured that it's quiet, easy to use, and the quality of Braille and tactile graphics is unparalleled. The Tiger Software Suite is bundled with the ViewPlus Cub Jr. Braille printer.
