

Colorino Colour tester

The Colorino colour tester can recognize more than 150 colours and will announce the colour in a clear voice to you.

Based on the famous CareTec ColorTest and appreciated by users all over the world, this new, efficient and self-explanatory colour detector can be a perfect partner for you. It detects more than 150 different colours, announcing them in a clear voice (currently available in 20 different languages). It offers 3 volume levels as well as the possibility to plug in earphones.

The light probe function detects sources of light and different acoustic signals enable the user to differentiate between natural and artificial sources of light. With its interface, the Colorino can be connected to other electronic devices, thus meeting also the requirements of deaf-blind users.

The device runs with 2 x 1.5 V AAA batteries as well as rechargeable batteries, which will last for many thousands of measurements. The battery compartment is easily accessible.
