

Esys 40 Portable Braille Display

Esys40 from eurobraille is a portable 40 cells Braille display with integrated Braille keyboard. It features a slot for a mini SD-card to quickly save text files onto a removable medium. Thanks to Bluetooth technology and communication software, it can be wirelessly connected to a mobile phone or PDA.

Use Esys40 to send instant messages without touching your phone or PDA! Its 10 key Braille keyboard, gives you the possibility to reproduce all the standard key combinations, both for typing and navigation, enabling you to fully navigate your mobile phone and PDA or your personal computer and any Windows application. Thanks to Esys40 auto sleep-mode, its battery life will allow you several days of autonomy.

Compatibility

- Talks
- Jaws for Windows
- Mobile Speak, Mobile Speak pocket
- Pocket Hal, SuperNova
- Window Eyes

Built-in applications

- **NOTEPAD:** create and edit simple text files. Use basic functionalities such as "find and replace" or "tag". Save your document and create an advanced tree folder structure. Use the "read only" function to read books or larger documents.
