

Deaf-Blind communication Solution FSTTY

Now deaf-blind PAC Mate users can communicate more effectively with friends and colleagues in the classroom, workplace, over the Internet, and via phone with Freedom Scientific's deaf-blind solutions for the BX and QX series PAC Mate.

PAC Mate, Freedom Scientific's powerful and accessible Pocket PC, has always come installed with MSN Messenger - a great way for deaf-blind users to hold conversations long distance, over the Internet, or within any room with a wireless connection. The PAC Mate adds support for AOL® Instant Messenger (AIM®) including the AIM Buddy List. Add

Hamilton Internet Protocol (HIP) Relay™ services to your Buddy List, and quickly and easily make relay calls anytime you have an Internet connection. PAC Mate is compatible with- and recommended by New Zealand Relay.

Add the Freedom Scientific FSTTY package for even more telephone support for deaf-blind users. The package includes a TTY modem and a software application that can be used with a PAC Mate BX or QX with a 20-cell or 40-cell braille display to place and receive direct calls.

FSTTY also includes these extra efficiency features:

- Pass information along to others quickly and efficiently during a TTY call.
- Easily and quickly copy text from entire phone conversations or portions of conversations and paste into other PAC Mate files.
- Keep safe and accurate records of your TTY conversations.
- The FSTTY package includes a PAC Mate, Braille Display, TTY modem and leather carry case. Included is also a Netbook PC that can also be used as a visual display for the PAC Mate.

Face-to-face personal communications

Now Bluetooth connectivity teams with PAC Mate to create a truly portable way for deaf-blind individuals to engage in real time conversations with others almost anywhere, at any time - without the need for a specially trained interpreter. FaceToFace works much like a TTY call without a phone line. Two parties communicate wirelessly at up to 30 feet apart - virtually anywhere in the same room. The FaceToFace Bundle comes with a Pocket PC.
