

Focus 40 Blue Braille Display

The Focus 40 Blue offers the latest in Braille display technology. It connects via USB or wirelessly with Bluetooth. It's a real space-saver, too.

The Focus 40 Blue employs all the advanced features of the popular Focus line of Braille displays and options that can be easily configured through JAWS for Windows.

Focus 40 Blue at a Glance

- 40 seamless cells of Braille
- Bluetooth 2.0 connectivity with 20-hour battery life
- USB2 connectivity
- Support for selected cell phone screen readers
- Integrated Perkins-style keyboard
- Refreshable Braille cells with a seamless construction that feels like reading Braille from paper
- Quick movement around documents with natural hand movements for greater productivity.
- Read documents and e-mail, work with spreadsheets, and surf the Web
- Select your personal Braille firmness with VariBraille Braille Display

Advanced navigation features designed so your hands seldom need to move away from the Braille display. The exclusive WHIZWHEELS let you scroll by line, sentence, or paragraph, or pan through a document.

10 configurable hot keys centered behind the cursor routers give instant access to many Braille and JAWS commands. Use these to enable Contracted Braille, switch to display modes such as structured and line mode, or perform keyboard commands like TAB, SHIFT + TAB, HOME and END.

When used with JAWS, the Focus 40 Blue supports the popular **Braille Study Mode**, an interactive tool for teaching and learning Braille.
