

## PAC Mate Omni Note Taker

The Ultimate Mobile Computing Solution for the Blind – the PAC Mate Omni.

The PAC Mate Omni is Freedom Scientific's accessible Pocket PC. It provides a host of productivity tools that enable access to virtually every application that sighted users of mainstream PDAs enjoy.

The PAC Mate Omni runs "Mobile" versions of popular Microsoft Office applications and uses ActiveSync to seamlessly synchronize with your desktop computer. Your e-mail, Contacts, appointments, files, Tasks, and even Web favourites are effortlessly updated every time you connect. It all happens in the background, while you use your PC or PAC Mate. The versatile PAC Mate Omni meets the on-the-go needs of users at work, at school, and at play with everything from word processing, to spreadsheets, to mobile Web access.

The PAC Mate Omni is available with Qwerty or Braille input and has speech output. The modular concept allows a 20 or 40 cell Braille display to be connected. These same Braille Displays can also be connected directly to a PC using a USB port.

### Features

- Modular concept
- Microsoft's direct push technology for real-time synchronization of Inbox, Calendar, Contact and Tasks
- Smart filtering for rapid location of e-mail messages
- Easy information searches via Windows
