

Platon Scientific Calculator

Platon is the latest scientific calculator with integrated speech output.

It provides basic operations such as square root, percentage, power of, but also trigonometric (sine, cosine, tangent), logarithm (natural or base10), statistical (mean and standard deviation) and financial operations (compounding interest, regular payments, present value), all in a small and handy device!

The conversion menu can be accessed by the push of a button. It uses built-in constants to quickly calculate and convert volume, length, weight, temperature and currencies.

The numbers are entered using the big and clearly arranged keys and are displayed on the large 10-digit-display. At the same time every keystroke is accompanied by clear and natural speech output through the built-in speaker, where also an earplug can be used. The result can either be announced as a total or digit by digit. Date, time and even an alarm can be set.

Technical Details:

- Slim, ergonomic design
- Light gray keys
- Dimensions: 15.4 x 6.4 x 2 cm
- Weight: 130 g (incl. batteries)
- Power supply: 2 x 1,5V AAA batteries
- Display: 10-digit LCD display (7 mm)
- Volume: six different volume levels
- Connection jack for headphones
- Automatic switch off in standby mode after 60 seconds
- Key lock

Includes:

2 AAA batteries, manual
