

Zip Duo Collapsible CCTV

The MagniLink Zip Duo is a stylish foldable CCTV, based on the latest technology and features a distance camera. It weighs only 9 kg and comes in a handy carrying case. Foldable & light Just by performing a few simple steps, the MagniLink Zip collapses into a portable unit for your convenience.

Because of its portability and distance camera, it is the ultimate video magnifier for school and office environments.

It is very easy to change between the close up reading- and distance camera by a footswitch. The MagniLink Zip DUO can therefore be used for a broad variety of tasks. Use the distance mode to look at the whiteboard and use the reading mode to magnify your books, magazines and other written material. The distance camera can both be mounted on top of the unit or it can sit next to it on an optional tripod.

The Zip Duo uses a 17" WideScreen TFT screen that is as wide as a traditional 19" screen. This means more words per line are visible. Of course the Duo has auto focus on both the internal camera and the distance camera.
