

Zoomtext Magnification & Speech Software

Designed for the vision-impaired, ZoomText brings a whole new level of clarity to your computer. With advanced text magnification and powerful reading tools, you'll find that whether you're surfing the web, creating a document, or emailing friends, ZoomText lets you see, hear and use your applications more easily than ever before.

- ZoomText now magnifies from 1x to 36x and includes fractional powers of 1.25x, 1.5x, 1.75x and 2.5x. Exclusive 'xFont' technology displays the clearest text possible.
- Change screen colours to eliminate glare and reduce eyestrain.
- Enhance the size and colour of the mouse pointer, text cursor and control focus, making them easier to find and follow.

Zoomtext is also available in a version with speech

- Choose from a variety of speech synthesizers, including the new NeoSpeech (English), recognized for its human-sounding voice quality.
- Sit back and let AppReader or DocReader read your documents, web pages and email, highlighting each spoken word along the way.
- ZoomText's friendly user interface makes it easy to access and adjust all of ZoomText features using the mouse or the keyboard.

ZoomText Anywhere, Anytime

With ZoomText USB, you can install and run ZoomText whenever and wherever you need to (with administrative privileges), without having to purchase additional licensing or activate each installation of the software. Your personalized ZoomText configuration settings are saved to your USB drive and are automatically loaded each time you plug in and start ZoomText.

Compatibility

- Windows XP
- Windows Vista 32 and 64 bit versions
- Windows 7 32 and 64 bit version
