

The kReader mobile from knfb Reading Technology is a major advancement in portability and functionality of print access for struggling readers and those learning a second language.

The kReader mobile allows users to snap a picture of virtually any document, including mail, receipts, handouts, memos and many other documents.

The proprietary document analysis technology determines the words and reads them aloud to the user. Reading in other languages is available, along with translation between languages. This is a truly portable solution to reading on the go, allowing users to read what they want wherever they happen to be.

The Mobile Reader is a multifunction Nokia N82 cell phone which has the functionality of a reading device. The reader can be activated and ready to use with the touch of a single button on the phone. The user takes a photo of the print to be read and the character recognition software in conjunction with high quality text-to-speech will read the contents of the document aloud. At the same time, it can display the print on the phone's built-in screen and highlight each word as it is spoken. Additionally the user can snap pictures and read in several languages as well as translate between languages.

- Reads most printed documents, from letters and memos to pages in a book
- Reads address labels and package information and instructions
- Displays each sentence visually and highlights each word as it is read
- Stores thousands of pages using easily obtainable flash memory
- Transfers text files to and from computers
- Adjusts reading speed and reading voice to suit user's preference
- Available to snap pictures and read

in a number of languages

- Ability to translate between languages, displaying and reading aloud translated text

In addition, the user can access the other functions of the phone device including making and receiving phone calls, personal information management such as contacts, calendar, etc. Also contains ability to run GPS programs, access to Adobe® PDF files, voice recorder, music player and much more.
